What is it

This application downloads all Gkrellm theme files, .tar.gz files listed on a web page and unpacks them.

The recommended location to download files to is:

`~/.gkrellm2/themes`

How to

To download and unpack all Gkrellm theme files listed on the www.muhri.net web page:

1. Click the 'Choose' button and select a location of where you want themes to reside.
 - you may want to choose a temporary location just to see what you get first.
 - otherwise Gkrellm expects to find themes in: `~/gkrellm2/themes`
2. Click the 'Download themes' button.
 - file names will appear on the right as they are downloaded
 - the Qty: field will tell you how many files are being downloaded.
 - the progress bar will indicate how long until completion.
 - complete downloading of all themes takes about 1 or 2 minutes.
3. To theme Gkrellm:
 - right click gkrellm and select: Themes
