

Get a list of theme file names and quantity of themes listed on the web page.

Download all theme files listed on the web page or just the few theme file names listed in the 'get only' text field.

Where to download theme files. Choose button opens a directory chooser.

The screenshot shows the 'Gkrellm Theme Downloader 0.1' window. It features a 'Qty and names only' button on the left, a 'Download themes' button in the center, and a 'Choose' button on the right. Below these buttons are three text areas: 'Theme file names Qty:', 'Where to download and extract gkrellm themes', and 'only get'. A 'Stop' button is at the bottom left, and a 'Close application' button is at the bottom right. A progress bar is located at the bottom center. Annotations with orange lines point to various elements: 'Qty and names only' points to the first text area; 'Download themes' points to the second text area; 'Choose' points to the third text area; 'only get' points to the progress bar; 'Stop' points to the 'Stop' button; 'Close application' points to the 'Close application' button; 'Where to download and extract gkrellm themes' points to the 'Where to download and extract gkrellm themes' text area; 'only get' points to the 'only get' text area; 'Choose' points to the 'Choose' button; 'Where to download theme files. Choose button opens a directory chooser.' points to the 'Choose' button; 'Download all theme files listed on the web page or just the few theme file names listed in the 'get only' text field.' points to the 'only get' text area; 'Get a list of theme file names and quantity of themes listed on the web page.' points to the 'Qty and names only' button; 'List of theme file names available or files that have been downloaded.' points to the 'List of available theme files.' text area; 'Web page that has list of themes' points to the 'http://www.muhri.net/gkrellm/nav.php3?node=gkrellm&sort=added&conf=DESC' text area; 'File names should be space separated.' points to the 'theme1.tar.gz theme2.tar.gz' text area; 'Select the 'only get' check box to enable this field.' points to the 'only get' text area; 'Total download progress.' points to the progress bar.

What is it

This application downloads all Gkrellm theme files, .tar.gz files listed on a web page and unpacks them.

The recommended download location is:

`~/.gkrellm2/themes`

How to

To download and unpack all Gkrellm theme files listed on the www.muhri.net web page:

1. Click the 'Choose' button and select a directory where unpacked themes should reside.
 - You may want to choose a temporary location just to test.
 - Otherwise Gkrellm expects to find themes in: `~/.gkrellm2/themes`
2. Click the 'Download themes' button.
 - File names will appear on the right as they are downloaded
 - The Qty: field will tell you how many files are being downloaded.
 - The progress bar will indicate completion time.
 - Complete downloading of all themes will take about 1 or 2 minutes.
3. To theme Gkrellm:
 - Right click gkrellm and select: Themes
